

Cut out the TEST MIDdisc cleanly along the edge.
Make sure it is not bent or creased.

midink.de

Please keep everything clean and remember that this printout is only a provisional solution. If you would like an original LAB-measured MIDdisc, please visit MIDINK.de. A calibrated MIDdisc will bring your results closer to the intended target. Your self-printed MIDdisc is not calibrated and therefore cannot guarantee color accuracy. It is provided as a free way to test MIDINK and experience how the system works.
